

Diocese of Owensboro

COVID-19 and the Schools

1. YOU are NOT sick and have NOT been in contact with someone with COVID-19: Guidelines to be at School:

- Employees and students must self-screen at home prior to heading to school.
- You must wear a face mask unless in your own enclosed office space or permitted by the teacher to remove your face mask. This includes remaining masked at all meetings, regardless if social distance can be maintained.
- You must distance at least 3 feet away from co-workers, visitors and classmates.
- You must wash your hands frequently, sanitize, clean frequently touched item, etc.

2. YOU are NOT sick but someone in your household does not feel well: Guidelines for Staying Home or Returning to School:

- If the household member does NOT have COVID-19 symptoms (see a list of symptoms below), follow section 1 above.
- If the household member HAS symptoms of COVID-19, follow section 5.

3. YOU were in close and direct contact with someone with COVID-19 in a classroom setting but YOU are NOT sick or showing signs and symptoms:

- If everyone was properly masked: close and direct contacts within 3 feet of positive case should monitor for symptoms for 14 days; if symptoms develop, quarantine and get tested, whether fully vaccinated or not.
- If anyone was unmasked, in a classroom setting, close and direct contacts must follow the quarantine guidelines below.
- This applies to a classroom setting ONLY. Does NOT apply to high-risk activities such as lunch, band, choir or extra-curriculars.

4. YOU were in close and direct contact with someone with COVID-19 not in a classroom setting and who lives outside your household but YOU are NOT sick or showing signs and symptoms:

Guidelines for Unvaccinated Individuals Staying Home or Returning to School:

- Please let your school know which quarantine option you are following.
- Individuals in quarantine should self-monitor for signs and symptoms of illness. If symptoms occur, they should contact their healthcare provider and follow section 5.
- You may work from home during your quarantine.

Guidelines for Exposures:

Daily symptom monitoring continues through Day 14 and, the individual must strictly adhere to other recommendations such as mask use. They should be advised that if any symptoms develop, they should immediately self-isolate and get tested.

Fully vaccinated individuals (14 days have passed since final vaccination dose) or someone who had a positive test of COVID-19 in the past three months and recovered, who are exposed to someone with suspected or confirmed COVID-19 are not required to quarantine if they remain asymptomatic after exposure. They must wear a mask at school and it is recommended they be tested 3-5 days after exposure.

DIRECT CONTACT:

Defined as anyone who was within 6 feet of an infected COVID-19 person for at least 15 minutes cumulative starting 48 hours before the person began feeling sick. **In the K-12 indoor classroom setting, the close contact definition excludes students who were at least >3 feet away from the infected student if both students were properly masked. This exception does not apply to teachers, staff, or other adults in the indoor classroom setting.**

Quarantine Guidance:

1. Quarantine for 10 days from your last exposure and have NO symptoms;
2. Quarantine for 7 days if you have a negative COVID-19 test on or after Day 5 and have NO symptoms;
3. In multifamily homes, if the positive case can isolate, then close contacts can quarantine for 10 days; however, if there are multiple family members positive or showing symptoms, the health department should be consulted for input;
4. Quarantine varies based on KHSAA requirements for athletes to return to practice or games: <https://khsaa.org/special-programs/covid-19-information/>;
5. Quarantine could be modified for staff/students that are participating in the "Test to Stay" program at their school.

COVID-19 SYMPTOMS:

Fever of 100.4 (or higher) or chills; new cough; shortness of breath or difficulty breathing; fatigue; muscle or body aches; headache; new loss of taste or smell; sore throat; congestion or runny nose; nausea or vomiting; or diarrhea.

Diocese of Owensboro

COVID-19 and the Schools

5. YOU are sick with COVID-19 symptoms but have NOT been tested for COVID-19:

Guidelines for Staying Home or Returning to School:

- Employees and students must self-screen at home prior to heading to school.
- Those who have COVID-19 symptoms (could be only one symptom) should immediately isolate and contact their medical provider or use telehealth for further instructions. Those unvaccinated individuals that reside in the same residence with the individual with the COVID-19 symptom(s) may return to work or school if not having any symptoms. However, if the ill child's healthcare provider performs a COVID-19 test, all unvaccinated individuals in the household will need to isolate until the results are known. Vaccinated individuals that reside in the same residence with the individual with the COVID-19 symptom(s) may return to school if they remain asymptomatic but must wear a mask.
- Individuals with symptoms may return to work or school when symptom-free and fever-free for at least 24 hours (without fever reducing medication) and a health care provider's clearance is preferred. Other unvaccinated individuals in the household may return to school after a healthcare provider has provided an alternative diagnosis (i.e. strep throat, sinus infection, ear infection, etc) for the ill individual. All must have a clearance to return to school.
- The period of being 24 hours symptom-free begins after midnight of the day symptoms started. For example, if symptoms were present on Monday, the earliest the individual may return to school is Wednesday.
- If the household member HAS COVID-19, follow section 6.

6. YOU or someone in your household (regardless of vaccination status) are sick and your healthcare provider told you that YOU are POSITIVE for COVID-19 (based on lab test or symptoms):

Guidelines to be at Home:

- Notify the school.
- Those who test positive must provide complete information for contact tracing purposes.
- Those who are tested for COVID-19 must stay in constant contact with the COVID-19 testing location so the school can be notified immediately of any positive results and contact tracing can start right away.
- Separate yourself from others in your household, do not share anything (utensils, phone, etc.), and isolate as follows:
 - Those who tested positive but never develop symptoms can end isolation after 10 days since the positive test.
 - Those who tested positive and have moderate to mild symptoms can end isolation after 10 days since the first symptoms appeared; if at least 24 hours have passed without a fever and other symptoms have improved.
 - Those who tested positive and have severe illness may require more than the 10 days of isolation.
 - In all cases, the above isolation guidance should be followed.
- Those unvaccinated individuals that reside in the same residence with the individual who tested positive for COVID-19 need to receive a release from the school, working in consultation with the local health department.

Guidelines to be at School:

- Those who test positive for COVID-19 and have completed their quarantine and have been symptom-free for 24 hours may return to school.
- Those returning to school after being released from isolation after having been tested positive for COVID-19 should be restricted from being around any immunocompromised individuals.

Additional COVID-19 Guidance

- Schools, with input from the local health department, will determine length of quarantine.
- Home tests will not be accepted. COVID-19 testing must have a test administered by a health professional and a copy of the results must be submitted to the school.

If a school's county remains orange or lower for two consecutive Fridays, as reflected on the map of Kentucky's COVID Incidence Rate, the school may decide whether to continue to require masking. However, if a county returns to red, masking may be required again until that county returns to a lower COVID-19 incidence rate level.

In general, people do not need to wear masks when outdoors, though mask use may be considered in outdoor settings that involve sustained close contact with other people who are not fully vaccinated.

Diocese of Owensboro

COVID-19 and the Schools

Exposure to a Positive Case

(positive case isolates)

Those Staff/Students that ARE MASKED

(Positive case and close contacts that are MASKED)

Close and direct contacts within 3 feet of positive case should monitor for symptoms for 14 days.

If any symptoms develop, they should immediately self-isolate and get tested.

If there is a cluster of cases in a classroom setting, it could result in the entire classroom being quarantined.

Those Staff/Students that ARE UNMASKED

(Positive case and/or close contacts that are UNMASKED)

Close and direct contacts within 6 feet of positive case must quarantine* using one of the 4 options:

1. Quarantine for 10 days from your last exposure and have NO symptoms;
2. Quarantine for 7 days if you have a negative COVID-19 test on or after Day 5 and have NO symptoms;
3. In multifamily homes, if the positive case can isolate, then close contacts can quarantine for 10 days; however, if there are multiple family members positive or showing symptoms, the health department should be consulted for input.
4. Quarantine could be modified for staff/students that are participating in the "Test to Stay" program at their school.

*Unless fully vaccinated or have been ill with COVID-19 within the previous three months and recovered, and without any symptoms.

Note:

Applies to the classroom setting ONLY. Does NOT apply to high-risk activities such as lunch, band, choir or extra-curriculars.

Please see Section 4 of exposures for fully vaccinated individuals or those who had a positive test of COVID-19 in the last 3 months.
